The main scientific purpose of the proposed STSM is to develop an Open policy for sharing of metadata in the framework of the project. The STSM will allow research collaboration on the main legal (copyright law) issues related to the main purpose. In order to be achieved the objective shall undertake research in the following directions: - Investigation of the current copyright and other legal issues in the framework of the project; - Investigation on the current EMLO policy on metadata sharing; - Copyright issues in bulk data reuse; - Practical issues related to the sharing of metadata; types of metadata etc.; Consultations on the above issues are planned with the core team of Culture of Knowledge/EMLO and in particular Miranda Lewis (Digital Editor for Cultures of Knowledge) and Arno Bosse, Digital Project Manager. The scientific consultations/discussions are planned in both directions – 1) on practical issues related to the metadata' sharing, Assessment of the positive/negative features of current models; 2) copyright issues/open policy development in the project. Based on the above the main points in the development of an open policy for sharing of metadata within the digital platform of the project will be outlined.
